

## **Tamarisk's Statement on Coronavirus Measures**

**Tamarisk Assisted Living Residence ([www.tamariskri.org](http://www.tamariskri.org)) places the health and wellness of our residents and employees as our highest priority. We are continuing to monitor the coronavirus situation very closely to ensure we are taking all appropriate measures to protect our communities, residents and employees.**

**To date, there have been no reported cases or interruption of services resulting from coronavirus within our communities, and residents and employees are receiving ongoing communication updates from our corporate and campus leadership teams. Our healthcare team, in cooperation with state and local partners, has been diligent in enacting precautions within Tamarisk. These measures include reinforcing infection control procedures and monitoring the flow of traffic within the community.**

**In conjunction with these efforts, our residents and staff have been urged to follow the recommendations from the Centers for Disease Control and Prevention (CDC) (<https://www.cdc.gov/coronavirus/2019-ncov/index.html>) for preventing any viral respiratory illness, including regular washing of hands, practicing good cough etiquette, and advising sick employees to stay at home if they exhibit signs of the virus.**

**Further, Tamarisk has implemented a policy for residents, employees, vendors and visitors who have traveled to or plan to travel to high-risk areas in order to monitor their health status following CDC guidelines.**

**Thank you for your support while we ensure the safety of all of our residents and staff. We will continually update our web page with any changes in campus operation or as new information is available. For the latest information and resources about the coronavirus, we recommend visiting the following helpful websites of LeadingAge (<https://www.leadingage.org/covid19>) and the CDC (<https://www.cdc.gov/coronavirus/2019-ncov/index.html>).**
